CHARGING INSTRUCTIONS

Firmly place your Smart Candles onto the charging base receiving pins. If you are using more than one charging base, slide the bases firmly together. (The Platinum Series Power Adaptor is designed to charge 12, 24, 36 or 48 Smart Candles up to 4 charging bases per power adaptor) If you are using the Smart Docking Station, firmly slide the charging bases into the bays provided. Insert the supplied power adaptor into the charging base or docking station and plug in. The charge indicator lights will illuminate Red when charging and Green when fully charged. If this does not occur see Trouble Shooting Section Below.

TO CONDITION CANDLES A CHARGE OF 20 HOURS IS REQUIRED

Charge your Smart Candles for 20 hours to complete the conditioning charge. After 20 hours of charging remove your Smart Candles from the charging base, turn them on and allow them to DISCHARGE COMPLETELY. Your Smart Candles are now ready to be recharged.

IMPORTANT: FAILURE TO FOLLOW THESE INSTRUCTIONS VOIDS MANUFACTURE'S GUARANTEE.

STORAGE: Storage is recommended if your Smart Candles are not going to be used for more than 4-weeks. To store your Smart Candles, fully charge and remove them from the charging base, making sure the on/off switch is in the off position.

TROUBLE SHOOTING: The Platinum Series Power Adaptor is designed to charge 12, 24, 36 or 48 Smart Candles up to 4 charging bases and comes equipped with an in-line reset button. Attempting to charge more than 48 candles will trip the reset. Use only the Platinum Series Power Adaptor provided to recharge your Smart Candles. Failure to do so will void manufactures guarantee.

If indicator lights do not illuminate once plugged in check the reset switch and reset if tripped.

If indicator lights still do not illuminate check your power supply, double check base connections, power cord connection and repeat the Charging Instructions listed above.
